

**JOB POSTING**  
**Course Instructor – Winter Position 2018**

**FOR3005H – Stresses In the Forest Environment**

**Course Description:** The course focuses on the natural functioning of forest systems with emphasis on the disruption caused by stress factors in tree and forest development. Classification and identification of important stress factors including abiotic pollution, hydrology, forest pests, diseases, and competing vegetation are included in this course. Both urban and general forest situations are explored in understanding the principles and techniques of managing disturbed forests. An integrated approach to sustaining forest health will be taken through exposure to strategies of decision-making in appropriate laboratory and project assignments.

**Estimate of the course enrolment:** Approximately 25-35 graduate students

**Estimated TA Support:** Yes

**Sessional dates of appointment:** 1 January 2018 – 30 April 2018; **please note that this position includes the completion of any course work and grading not completed by 30 April 2018.**

**Salary:** \$7,359.07 (inclusive of vacation pay)

**Qualifications:** Preferably a Ph.D. degree or extensive experience in forest conservation; teaching experience an asset.

**Brief description of duties:** Prepare and deliver lectures, organize guest speakers, maintain course notes and readings, organize and lead a field trip, set and mark course assignments, which may include mid-term, essay and final examination or other assignments, with the support of a TA; compile, record and submit final marks. Be available to students through regular office hours.

To apply, please submit a covering letter, curriculum vitae and names for two possible references to:
